

1. What was Wall.e designed to do? (What is his “directive”?)
2. Are there others like Wall.e on the Earth? What has happened to them?
3. Why has this not happened to Wall.e?
4. How has Wall.e continued to work with no power supply?
5. How does Wall.e fix himself when he gets damaged?
6. How is this significant given our recent study of waste and recycling?
7. Does Wall.e have a home? What are some of the items in his home?
8. What is Wall.e’s hobby? Why do you think he does this?
9. Why is the cockroach significant?
10. What does Wall.e do with the plant when he finds it? Why do you think he does this?
11. Why is the plant significant?
12. Why has Eve (extraterrestrial vegetation evaluator) been sent to Earth? (What is her “directive”?)
13. Wall.e takes Eve to his home. What are some additional items that you notice in his home?
14. What are some human characteristics that Wall.e displays?
15. What does Eve do when Wall.e presents the plant to her?
16. What did the rocket pass through (break through) on its exit from Earth’s orbit?
17. How does the Earth look from space? Why? What was on the moon?
18. What do you notice about the humans? How are they different in the 22nd century?
19. What changes have occurred in their physical bodies?
20. What changes have occurred in their activities?
21. Is this indicative of society today? Explain.
22. How was lunch served? How is this indicative of today?
23. What activities do machines and robots perform for the humans?
24. What are the humans directed to do when the pod (Eve) containing the plant reaches the axiom?
25. When the captain opens Eve she is empty. What happened to the plant she contained?
26. The captain does some research about soil and planet Earth. What realization does the captain have about the condition of planet Earth? Why does he have to look up this information?
27. What realization does the captain have regarding planet Earth and why he must go back to Earth?
28. As the captain watches a video from the president of Buy n Large he is told that the Earth is unsustainable. One of the goals of environmental science is sustainability. What is sustainability?
29. What happens to the trash produced by the axiom? Where does it go?
30. Wall.e gets damaged and Eve repairs him, however, he is different. How is Wall.e different?
31. One thing that is so appealing about the movie is the interaction between Wall.e and Eve. In fact, Wall.e and Eve interact more than the humans do. **THINK ABOUT THIS**....Are we so dependent upon and linked to technology (cell phones, iPads, computers, video games,...) that we have sacrificed some of that which makes us human – human contact and interaction?
32. What do the humans find is the condition of the Earth when they return?
33. What do the humans do upon returning to the Earth?
34. As the movie ends, what hope do you have that the humans will be successful in their recolonization of the Earth? Do you see any evidence of this?
